**AN ORDINANCE TO ESTABLISH A JOINT HEALTH DEPARTMENT
WITH THE TOWN OF GRISWOLD**

The proposal is for a Health Department and not a Health District. A Health District is one which is full time and is composed of a Health Board which is comprised or proportional representation of the towns that belong to the Board.

The Health Department is an association between the towns in which there is representation as respect to per capital and there is shared costs.

In a Health District we are allowed a per capita allowance which is basically a \$1.50 and is dependent on the sizes of the town.

In general the towns lose autonomy when it forms a Health District because then the votes are based on the pro rated representation which is based on the population. In the Department concept the towns simply form an agreement and they are, of course, free to pull out at the end of the contract.

In this proposal the Sanitarian (college educated, state certified and regulated and certified in food services) would be shared by the two or more towns and the costs of the whole service would be pro rated.

Director of Health	\$ 7,000
--------------------	----------

Sanitarian	30,000
Secretary	7,000
Health Insurance	5,800
Pension	3,200
Travel	2,500
Workmen's Compensation	2,900

The population figures add to about 14,000 for both towns and Griswold has 72.6% and Lisbon has 27.4% . This works out to about \$42,000 for Griswold and 16,000 for Lisbon. To bring this figure into perspective we collected in excess of \$20,000 in fees from both towns and if this deducted from the total sum of \$58,000 we come to a figure of \$38,000. If this is divided by the population figure of 14,000 we come out with a figure of about \$2.70 per capita.

To make this proposal more of an inducement we have to change our fee structures. At present we are receiving too small a fee for housing projects, condos, engineered systems, review of building proposals, etc.
